This gangway allows the boarding of 150 Kg / 330 lbs maximum (one person at a time).
IDEAL FOR TENDER LIFTING.

X= maximum length of gangway when extended
Y= minimum length of gangway when retracted
C= rotational range of the base unit
D= height of the built-in part of the unit below deck level
E= height of the rotating base
α and β= the total angle the gangway can achieve.

In case of stanchions, the G dimension is increased of about 50mm

NEVER USE THE GANGWAY AS SPRINGBOARD. DIVING COULD CAUSE STRONG STRAINS THAT MIGHT DAMAGE THE GANGWAY AND ITS FASTENING ELEMENTS.
